EDUCATION

Gyan Ganga College of Technology
Bachelor of Technology in Computer Science

Jabalpur, MP
Aug. 2020 – Present

M.G.M. Higher Secondary School
ISC, Class XII

Jabalpur, MP
2020

PROJECTS

SimpleNotes | *Python, Django, SQLite, Bootstrap*

- A notes managing web app that lets different users to produce and save as many notes as they want.
- It uses the Django Framework to create the backend of the web app and SQLite as a database to save the different notes made by the user.
- Implemented User Authentication and Authorization.
- <https://github.com/SameerSahu007/SimpleNotes>

Street Fighter Clone | *Python, Pygame*

- Tried to reproduce a simple clone of the famous Japanese game known as Street Fighter.
- I used Pygame a python based game development library to design this game.
- Implemented collision detection and multiplayer mode.
- <https://github.com/SameerSahu007/Street-Fighter-in-Pygame>

LinuxMemesBot | *Python, python-telegram-bot*

- A telegram bot that scrapes memes from reddit and post them on a telegram channel.
- It utilizes Async PRAW to get the URL of the top post in the last 24 hours from the required subreddit.
- The python-telegram-bot library then post the meme on a telegram channel.
- <https://github.com/SameerSahu007/LinuxMemesBot>

Flask-todolist | *Python, Flask*

- A multi user to do list app built with the help of flask.
- Implemented a cookie based authentication system to verify the users
- It utilizes bootstrap for the styling the web pages.
- <https://github.com/SameerSahu007/flask-todolist>

Discord-uiclone | *Javascript, ReactJS*

- A fully functional clone of the discord landing page made with the help of ReactJS.
- Divided the UI elements in to different functional componend to efficiently manage them
- <https://github.com/SameerSahu007/discord-uiclone>

OPEN SOURCE CONTRIBUTIONS

Deviras

- Contributed to some python scripts that is being used for developers India subreddit which has over 80k+ members
- <https://github.com/developersIndia/deviras>

Open Privacy Tech

- Fixed a markdown bug on mindmap.openprivacytech.org
- <https://github.com/openprivacytech/mindmap.openprivacytech.org>

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, HTML/CSS

Frameworks & Libraries: Flask, Django, ExpressJS, ReactJS, Bootstrap

Developer Tools: Git, Visual Studio, PyCharm, IntelliJ
